in speculating on the edge of psychoanalysis pablo lerner questions and takes a step beyond the prevailing paradigm of lacanian psychoanalysis and its emphasis on the sovereignty of language and jouissance arguing for the existence of a primordial real void outside and independent of language lerner re thinks the structure and functioning of lacan s three

orders and their complex interrelations silence darkness and emptiness are the names of the voids within the symbolic the imaginary and the real and in the gaps between these orders the voids converge thus lerner re conceptualizes the fundamental structure of the field of subjectivity offering radical and original perspectives on a diverse range of psychoanalytical philosophical and theological topics chapters span themes such as creation and poetry death and solitude intuition and mysticism truth and being pantheism and polytheism the poetic art of interpretation and introduces a new mathematical conceptualization of psychoanalytic metapsychology and the clinical structures this volume offers new psychoanalytic perspectives of great interest for practitioners and scholars in the fields of psychoanalysis philosophy theology and literary studies

vinod acharya presents a new existential interpretation of nietzsche s philosophy he contends that nietzsche s peculiar form of existentialism can be understood only by undertaking a thorough analysis of his characterization and critique of metaphysics this reading remedies the shortcomings of previous existential interpretations of nietzsche which typically view existentialism as concerned primarily with the meaning of individual existence and therefore necessarily at odds with the abstraction and objectivity of metaphysical thought acharya argues that the approach of nietzsche s philosophy especially in his mature works is to make the typical existential position foundational and then to develop to the fullest the implications of this position this meta existential approach necessarily yields an ambiguous and open ended critique of metaphysics taking issue with the heideggerian the poststructuralist and the naturalistic interpretations this book contends that nietzsche neither simply overcomes metaphysics nor remains trapped within its confines acharya argues that an ever renewed encounter with and critique of metaphysics is an essential aspect of nietzsche s meta existentialism

according to the author psychoanalytic theory and practice which discloses the interminable falsity of the human subject s belief in the mastery of its own mental life is in part responsible for the coming of the postmodern era in this title originally published in 1993 barratt examines the role of psychoanalysis in what he sees as the crisis of modernism shows why the modernist position what he calls the modern episteme is failing and proposes that psychoanalysis should redefine itself as a postmodern method in barratt s innovative account of psychoanalysis which focuses on the significance of the free associative process freud s discovery of the repressed unconscious leads to a claim that is basic to postmodern ideas that all thinking and speaking the production and reproduction of psychic reality is inherently dynamic polysemous and contradictory he argues that subsequent attempts to normalize and systematize psychoanalysis are reactionary and antipsychoanalytic efforts to salvage the modern episteme that psychoanalysis itself calls into question

this is a reference for early modern philosophy representing the most contemporary research in the history of early modern philosophy it is organized by thinker rather than theme and covers every important philosopher and philosophical movement of 16th and 18th century europe

handbook of decision making includes the wisdom of the long theological and philosophical traditions of human society as well as a systematic exploration of the implications of contemporary evolutionary theories common patterns in decision making styles are identified as well as the common variations that different contexts may generate the text covers the multiplicity of mainstream decision making styles such as cost benefit analysis and linear programming it also explains alternative and emerging methods such as geographic information systems q methodology and narrative policy analysis practical applications are discussed using decision making practices in budgeting public administration and governance drug trafficking and information systems
