the present introduction to social psychology represents an attempt at a more synthetic type of treatment of the field than has ordinarily been given it seems to the writer that the time has arrived when schools of social psychology may properly be regarded as obsolete and the subject as a whole may be presented systematically in a sense social psychology overlaps a very large portion of social science and of psychology and education in this respect it is central to all psychological and social science disciplines this fact necessarily renders the content of social psychology voluminous it is no longer possible to treat this subject adequately in small compass the text books which have so far appeared although for the most part excellent from their several viewpoints are nevertheless but partial treatments so notably true is this that there exists a marked controversy as to what properly constitutes social psychology in part i of this volume an attempt has been made to bring this controversy into relief for the purpose of enabling the reader to see the subject as a whole originally the writer intended to publish this volume in five parts to make the synthetic treatment more pronounced but the length of the volume as thus planned was prohibitive and it was decided to change the plan somewhat the synthetic character of the treatment has been retained but the detailed presentation of the process of the development of personality and of self and social consciousness has been reserved for a second volume the present volume treats the subject from the standpoint of the more objective factors which integrate the personality and its responses in a social

environment throughout it has been the intention of the writer not only to make the treatment complete in itself but to keep the presentation on such a level that the volume can be used successfully as a second book in social theory following directly upon the introductory course in sociology in departments sociology if the approach to the social sciences is a psychological one the organization of this volume should make it available as an introduction to the first course in sociology economics politics and more advanced courses in history and literature in those departments which care to use it in this way that social psychology will ultimately be regarded as a necessary introduction to the several social sciences and the literatures can scarcely be doubted while the present volume is intended for undergraduate students it is hoped that it may also be used profitably in more advanced courses in combination with the more extended treatment of the subjective aspects of personality development later to be published preface psycinfo database record c 2006 apa all rights reserved

this book is written from the perspective of a social psychologist as a consequence the topics covered in the upcoming chapters were chosen from among those traditionally of interest to the discipline of social psychology a criterion for inclusion was the topic s usefulness in providing insights and or understanding of the social processes at work in sports settings to this end i have drawn extensively from mainstream journals in social psychology e g journal of personality and social psychology and grounded the discussion of topics and issues on the methodologically sound studies experiments they generally provide there is also an equally strong interdisciplinary emphasis that features research from physical education sociology management science and education i have made a further attempt not as successful as i would have liked to incorporate a substantial amount of the fine sports research that has been conducted overseas particularly in europe and australia i am hopeful that in bringing together the works of international scholars from a variety of disciplines a clearer and balanced outline of this field will take shape and now a word about the audience for this text and how to get the most from its pages i would suggest that the reader have taken a course in social psychology following an introductory level course an introductory course in research methodology would also be helpful
